

# NL Sense

What is one of the first things you notice when something starts to break down?

There is a sound. NL Sense recognizes events in a smart way, and automatically sends them to the cloud for sophisticated analysis and signal processing. You'll be surprised what NL Sense can tell you using sound, and how convenient the non-intrusive solution is to integrate into your existing solutions.

In addition to sound, NL Sense can also measure electrical current, temperature and humidity.

Browse the results online or connect them directly to your existing systems.

**Sensors per hub:**

- 4 acoustic sensors
- 1 current sensor
- 1 temperature + humidity sensor

**Power supply:**

- 5V / 24V / 230V (AC)
- Max 3W

**Size:**

- 97mm x 63mm x 31mm
