REACH Declaration of Conformity

To whom it may concern,

The European Union (EU) has adopted regulation no. 1907/2006, also known as the REACH (Registration, Evaluation, Authorization and Restriction of Chemicals) regulation, which became effective on 1st of June 2007.

REACH regulation requires article suppliers to inform recipients if an article contains a Substance of Very High Concern (SVHC) in excess of 0.1% by weight. Based on the best of our knowledge and the material content provided by our suppliers we inform that a single SVHC, more specifically lead is present in the materials that we use in our products including packing and shipping materials.

Lead (CAS No: 7439-92-1 -EINECS No: 231-100-4) was entered on the candidate list of June 27th, 2018. Lead is a component of bronze, copper alloys and solder alloys. This substance may be present at a concentration greater than 0.1 % by weight in some of the components that we use in our products (applications covered by EU RoHS 2 exemptions).

NL Acoustics Ltd. will provide sufficient information to allow safe use of the article including, as a minimum the name of the substance within a period of 45 days of the receipt of the request.

If you have any questions or require further information concerning NL Acoustics Ltd. implementation of REACH, please don't hesitate to contact us.

The official list of SVHC's can be found at:
<https://echa.europa.eu/candidate-list-table>

Customer Safe Use Information (REACH)

Substance name: Lead

CAS number: 7439-92-1

EC number: 231-100-4

SVHC decision number: ED 61/2018

Information given hereunder complies with the requirements of article 33 of the REACH regulation, of providing to its customers the necessary information about articles containing SVHC's (Substances of Very High Concern).

Risk Assessment

As a component of copper alloys, lead does not represent a risk to health, so handling plated items made with copper alloys poses no risk to the user.

This substance can be found in complex articles, with no release intended: electrical batteries and accumulators and machinery, mechanical appliances and electrical/electronic products (e.g. connectors, computers, cameras, lamps, refrigerators, washing machines).

Handling Instructions

No precautions are required for handling items manufactured from alloys containing lead in the as-supplied condition.

Disposal Instructions

The article should be disposed of in accordance with all applicable governmental regulations relevant to the geographical location.
